REVISOR'S NOTE: This section is new language derived without substantive change from Art. 43, § 122(b)(1) through (4), (7), and (8).

In item (1) of this section, the phrase "medical student or an individual in a postgraduate medical training program that is approved by the Board" is substituted for the phrase "resident physician, intern or student or equivalents", for clarity. Currently, there are no individuals in medicine equivalent to "medical students". Also "resident physician" and "intern" are no longer definitive terms in modern medical terminology.

In item (3) of this section, the reference to federal employment is substituted for the specific enumeration of types of federal employment, for clarity and to conform to current practice.
